

Get list of all program installed on all machines?

To get list of programs installed on each machine on your LAN

To get list of programs installed on each machine on your LAN but not grouped by computer, perform the following steps:

1. Press the **Shift** key, keep it pressed and click all machines that you want to search for the installed applications.

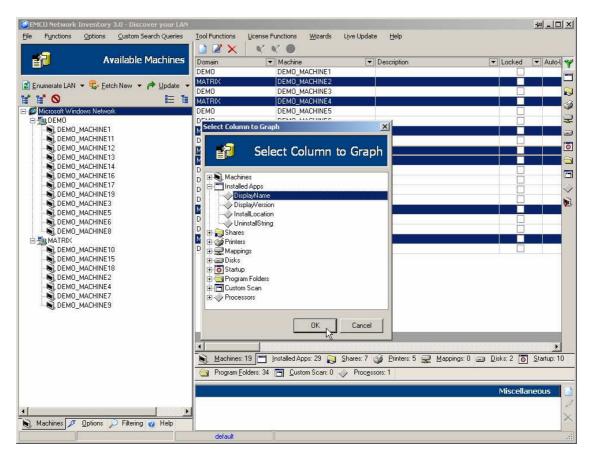

- Now, right click any of the selected machines, a popup menu will appear.
 Click the Chart Selected from the popup menu.
