## Configuring Tools in NI

Configuring Tools in NI

To configure tools in EMCO Network Inventory 5 perform the following steps:

1. Select **Configure Tools** menu item under **Options** menu.

2. **Configure Tools** dialog appears on the screen.

3. Click **Insert** button to create a new tool.

4. **Tools Item** dialog box will appear on the screen.

5. Type in the tools name in the **Name** field.

6. Type in the Command %Machine% in the **CommandLine** textbox where %Machine% will pass the machine name as a parameter for this command.

7. Click **Ok** button.

8. The added tool will appear in the tools list.
