

Change Share and Folder permissions

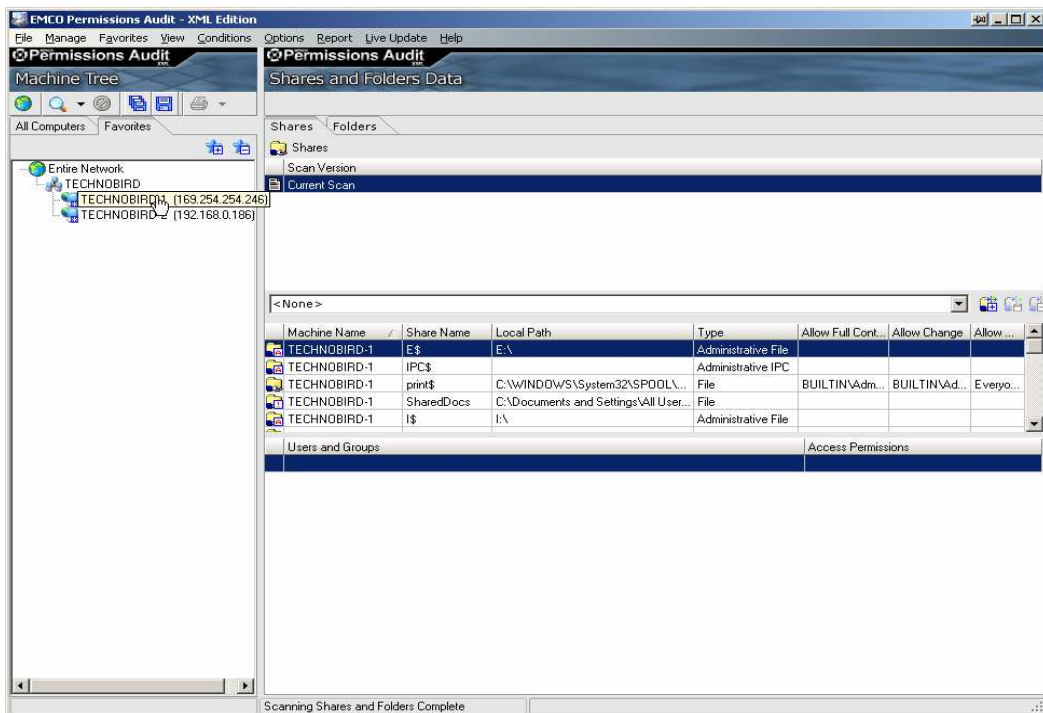

One of the powerful features of EMCO Permissions Audit XML Edition is that it enables network administrators to easily set and update the permissions on different available shares and folders across your network.

This tutorial will guide you on changing permissions for available shares on your network in EMCO Permissions Audit XML Edition.

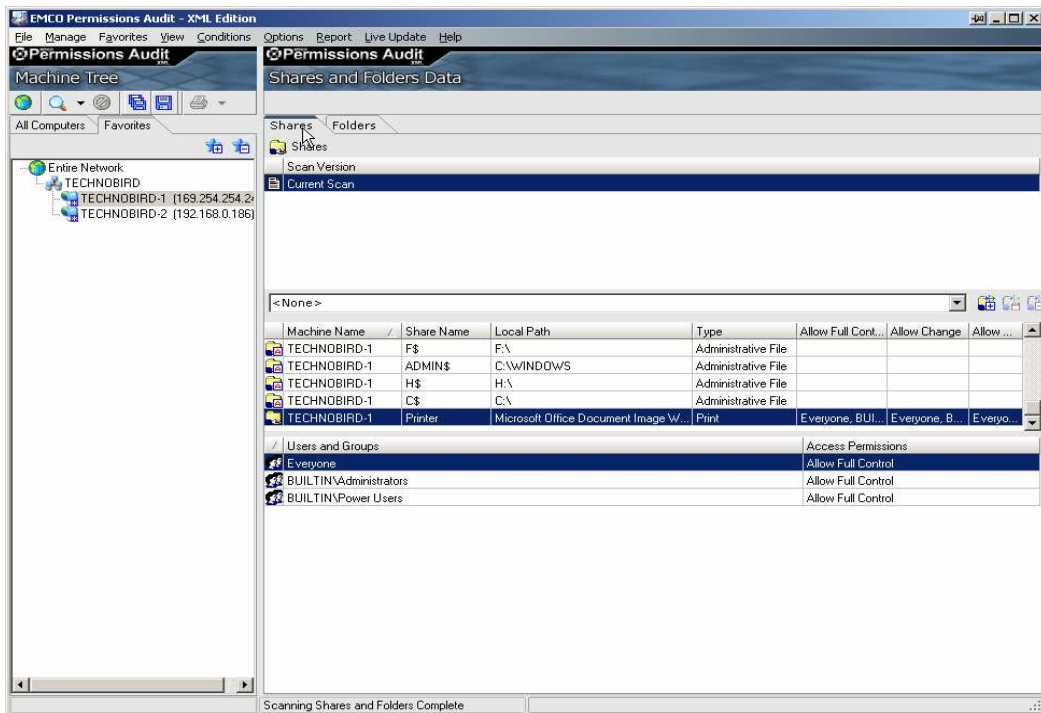

To change Shares permissions:

To change Shares permissions in EMCO Permissions Audit XML Edition perform the following steps:

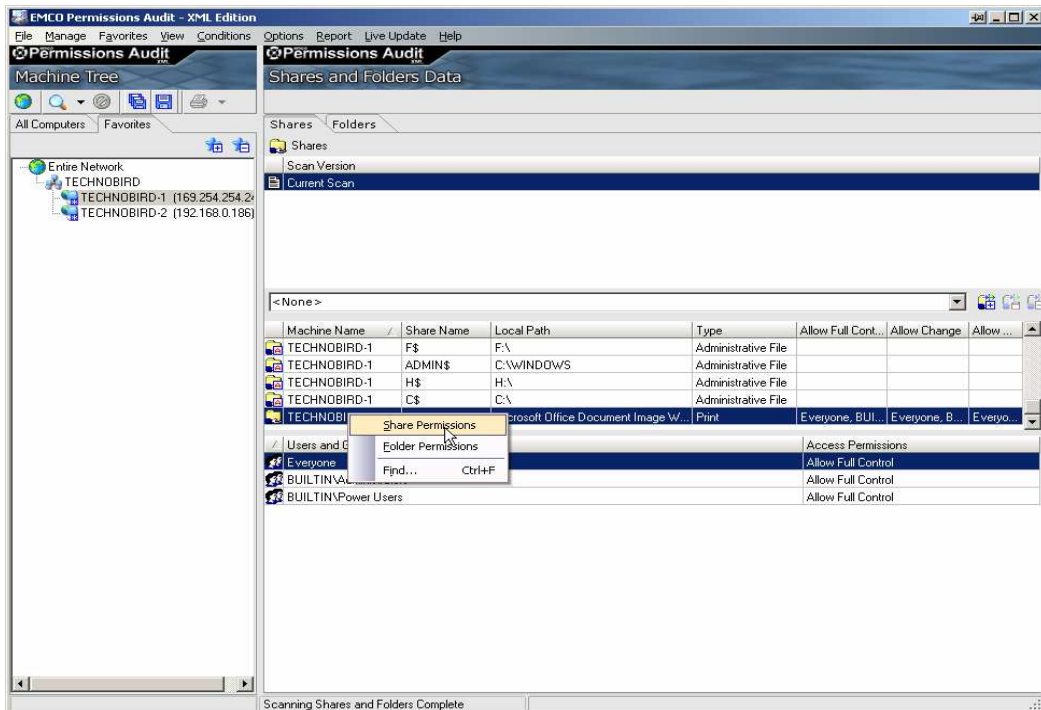

1. Select the machine that you want to process from **Available Machines** tab.

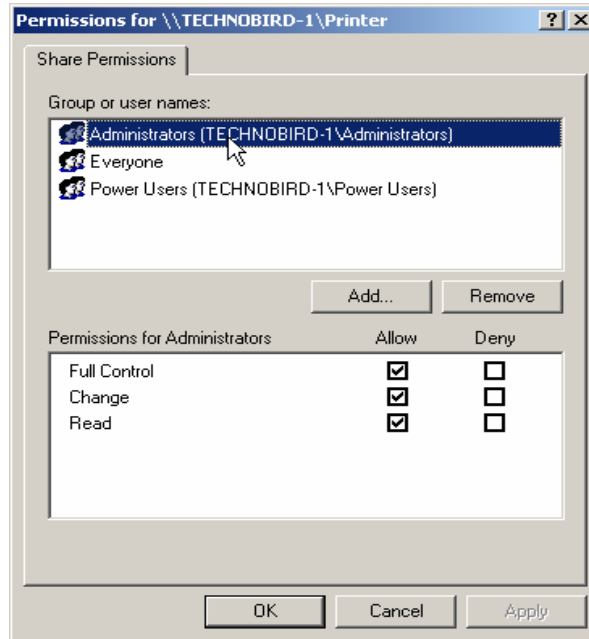

2. Switch to **Shares** tab.

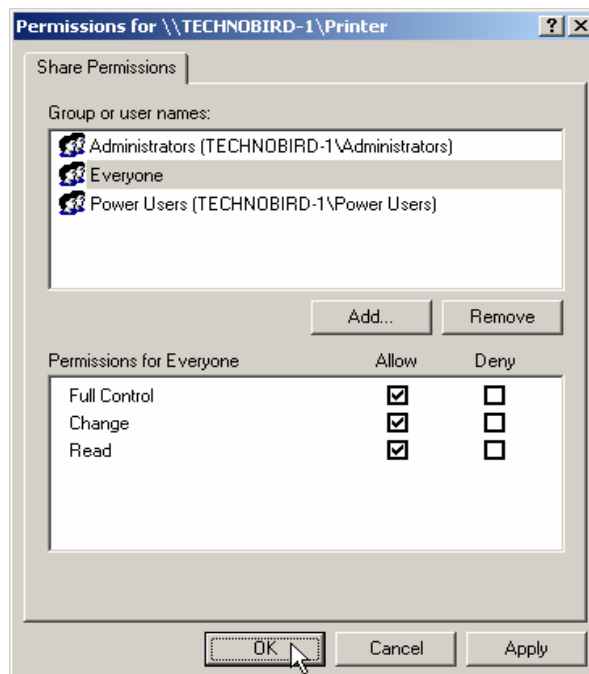

3. Right click on your required item from the available data and click **Share Permissions** menu item from the popup menu.

4. **Share Permissions** dialog box will appear on the screen.
5. Select your required users group from the **Group or Username** area.

6. Update the required permissions by checking the corresponding checkboxes and click **Ok** button.

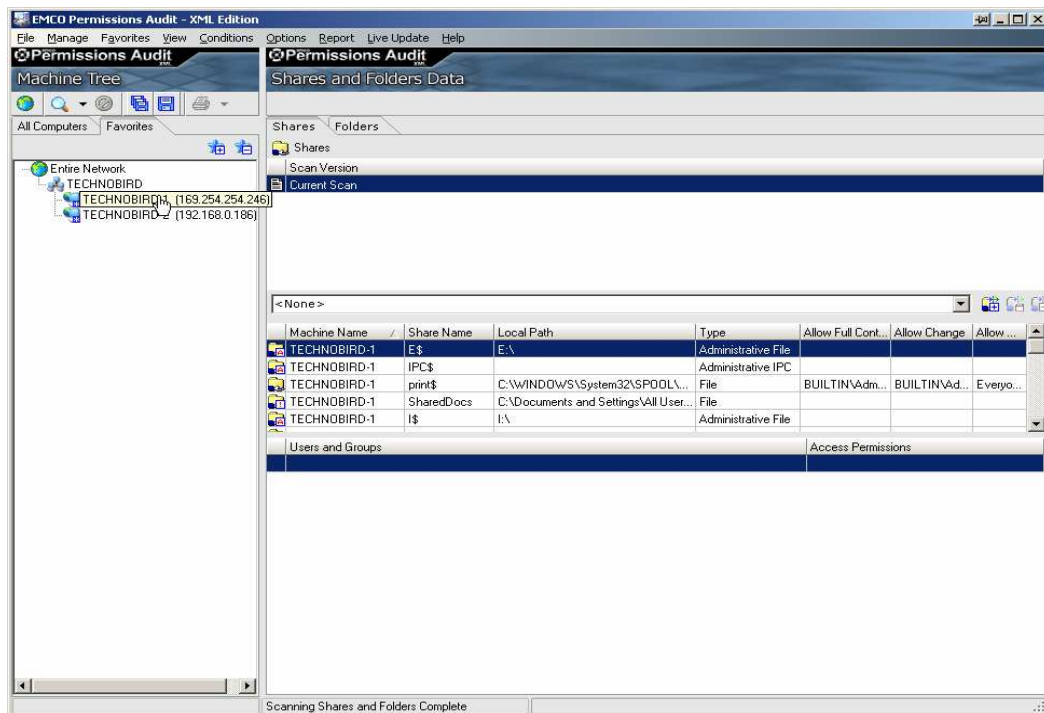

7. This will update the permissions on your selected shared item.

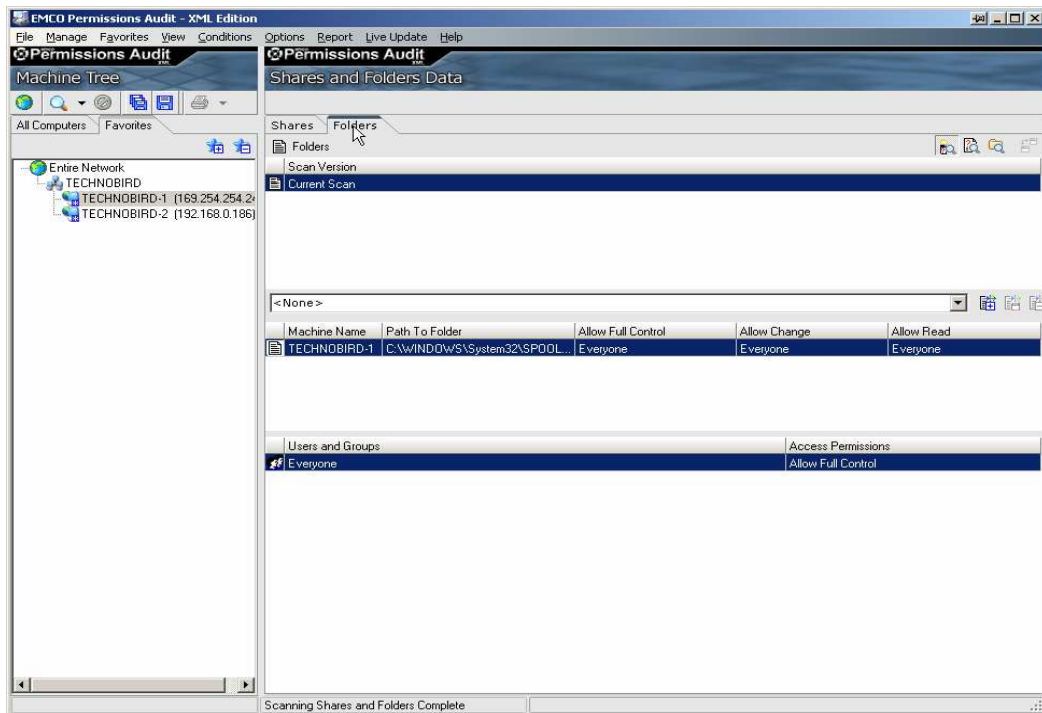

To change Folder permissions:

To change Folder permissions in EMCO Permissions Audit XML Edition perform the following steps:

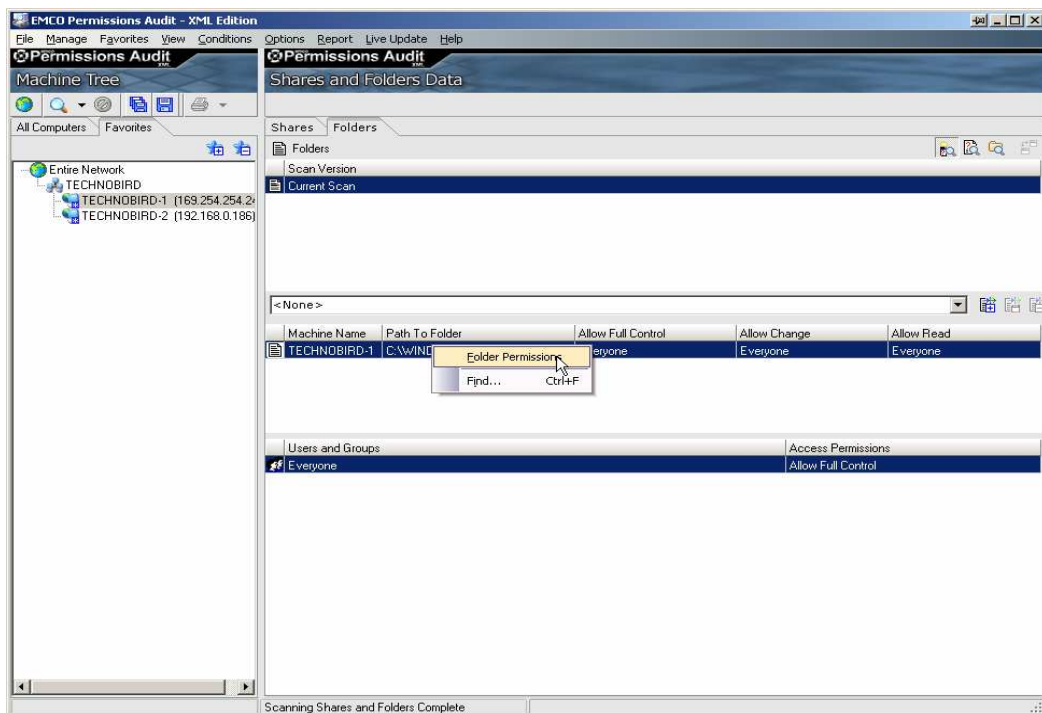

1. Select the machine that you want to process from **Available Machines** tab.

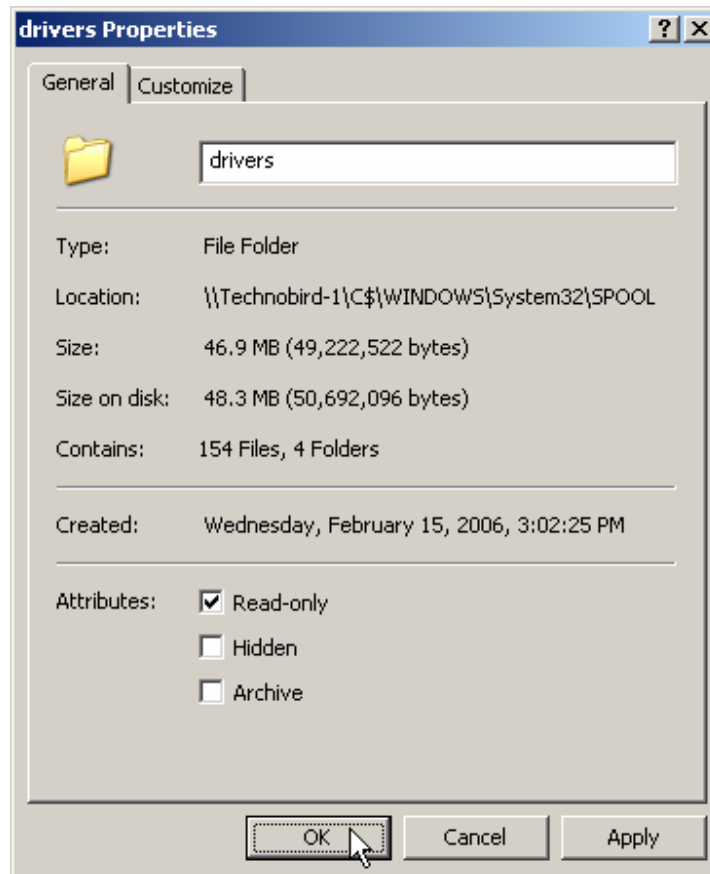

2. Switch to **Folders** tab depending on your requirements.

3. Right click on your required item from the available data and click **Folder Permissions** menu item from the popup menu.

4. **Properties** dialog box will appear on the screen.
5. Select your required properties by selecting the corresponding checkboxes.
6. Update the required permissions by checking the corresponding checkboxes and click **Apply** and then **Ok** button.

7. This will update the permissions on your selected folder.
