

EMCO Remote Administration 3.0 evaluation suggestions

EMCO Software has recently released another version of EMCO Network Management 2.0 with a new name EMCO Remote Administration 3.0. The reason behind this is that the new name actually reflects the exact functionality of the product.

The new version comes up with more advanced exciting features. EMCO Remote Administration 3.0 is an excellent product with the powers of remote deployment, which enables the remote execution of packages and scripts (.exe, .bat, .cmd, .msi, .vbs, .js) for unattended installations like Service Packs and Hotfixes. System Administrators can install, remove, or configure applications on remote computers within a LAN without physical presence on the remote computer.

Here are a few suggestions that you must keep in mind while evaluating Remote Administration 3.0 to get the maximum benefits out of this product.

- ✧ Compare the features of Remote Administration 3.0 with the similar competing product in this area on the market and you will be convinced that there is something special in Remote Administration 3.0 that will attract you towards itself.
- ✧ This product is available in different licenses so companies can choose the product with license based on their requirement. Check the pricing details for each license type to have a better idea which license is most suitable for you organization.
- ✧ Likewise other products of EMCO Software, Remote Administration 3.0 is also available at very reasonable prices. We bet you won't find any products with such colossal features at these reasonable prices.
- ✧ EMCO Software provides excellent 24/7 customer support. And its technical staff is available to solve the problems of its customers. Along with that EMCO Software also offers a wide range of online documentation and tutorials and help inside the program with web lookup.
- ✧ Remote Administration 3.0 has a built-in powerful network scan engine that provides different ways to scan your network. It can automatically discover all available machines on a network with just one mouse click.
- ✧ A powerful Macro Scripter is a plus to Remote Administration 3.0. It enables users to build and execute scripts in no time.
- ✧ No special programming skills required to build scripts in Remote Administration 3.0 macro scripter, its drag and drop feature for commands and the properties panel of commands solves all problems.
- ✧ Remotely install packages, hotfixes and service packs etc.
- ✧ Ability to send a script file and actions to hundreds of computers in one shot and run with administrator privileges.
- ✧ You can also specify different action that can be performed on remote machines, including, logoff, reboot, shutdown etc.
- ✧ Built-in Service Pack deployment wizard makes the installation of service pack on different nodes on your network a breeze.

Now we are confident enough to suggest you purchase EMCO Remote Administration 3.0 for your network and enjoy these exciting benefits.
